STATE OF THE ACADEMY ADDRESS

John Frazier

President of the American Academy of Health Physics

As I near the end of my year of service as President of the American Academy of Health Physics, I would like to thank my fellow Certified Health Physicists (CHPs) for entrusting me with this important role. During this year, I have become more aware of the contributions of prior leaders of the Academy who established a very efficient and effective organization. I have done my best to maintain and enhance the legacy of those leaders to achieve the goals of the Academy.

Those goals are summarized in our Strategic Plan and address four main areas, namely:

- Maintain a high-quality accreditation process
- Provide educational opportunities for CHPs and other radiation safety professionals to maintain superior skills and knowledge
- Maintain high standards for the practice of health physics, and
- Enhance the value of certification

I believe these goals have been met this year, through the efforts of the large number of volunteers who donate their time on Academy committees and the American Board of Health Physics. The following is a brief summary of some of the work of those volunteers in 2012.

I can report that the first goal was met through the hard work and dedication of the American Board of Health Physics, led this year by Board Chair C. A. “Gus” Potter, with key leadership from Part I Panel Chair Jay Tarzia and Part II Panel Chair Glenn Sturchio. The many hours contributed by the examination panel members to prepare and grade the 2012 examinations reflect the commitment of panel members to have the highest quality certification exam. Gus provided a brief update of some of the work of the Board in the September 2012 issue of *CHP News*.

The team that ensured that the overall examination process ran smoothly was coordinated by Executive Secretary Nancy Johnson. She directed or performed the work of each of the administrative steps of the examination process – from processing exam applications (over 300 this year) to notifying each candidate of the results – and all of the numerous steps in between.

This year Janine Katanic did an outstanding job as Chair of the Academy’s Exam Site Selection Committee, which ensured that a sufficient number of examination sites, with trained proctors to administer the exam, were available at each site. Janine provided a summary of her committee’s work this year in last month’s *CHP*

Corner. By the time you read this message, the Board and examination panels will have met to determine the successful candidates for the 2012 examinations. Look for the list of new CHPs in the January 2013 *CHP Corner*.

Some of the educational opportunities for CHPs are provided through the work of the Continuing Education Committee. This year this committee was chaired by Jim Willison. Jim and the members of the committee have identified quality health physics short courses for the Midyear and Annual meetings. Future courses & instructors are needed; especially for courses in which there is a great demand. Please contact Jim if you know of a course topic that should be presented, or if you would like to prepare and present a short course.

The Academy mourns the death of Mike Davidson, Chair of the Professional Development Committee. Mike's reports of the committee's activities were published in the February and August issues of *CHP Corner*. His passing in early October was a shock to us all. He will be greatly missed. The work of the Professional Development Committee will continue under Tom Johnson's leadership for the remainder of 2012.

The Title Protection / Professional Recognition Committee, chaired by Dan Mantooth, has been working to ensure the protection of federal, state, and/or local governments for the titles "Certified Health Physicist" and "CHP", and for recognition of the profession of health physics. Please contact Dan or Nancy Johnson if you know of any issue that warrants attention. Every year or so, the President of the Academy is called upon to respond to a person who is misrepresenting himself or herself as a CHP. Even as I write this message, I am weighing the most appropriate wording of a letter on behalf of the Academy in response to an organization reportedly selling "certificates" for health physicists.

We are fortunate that the Appeals Committee, chaired by Nick Panzarino, and the Professional Standards & Ethics Committee, chaired by Ruth McBurney, have not had claims or charges to investigate in 2012. I believe this is a result of the quality of the certification examination, and the professionalism & ethics of CHPs.

In the October 2012 issue of *CHP News*, Treasurer Drew Thatcher reported that Academy finances are in good order. Drew and the Finance Committee have worked closely with Academy Officers and committee chairs this year to prepare a budget for 2013 that represents more accurately the expenses that will actually be incurred during the year.

As I noted earlier, Executive Secretary Nancy Johnson of Burk & Associates is invaluable to the examination process. Nancy serves as the "corporate memory" of the Academy and the ABHP, which ensures continuity and consistency of our activities. She keeps us informed of tasks, timetables, commitments, and responsibilities throughout the year. I cannot say enough good things about the support Nancy has provided during 2012.

The Academy is fortunate to have Kyle Kleinhans and Harry Anagnostopoulos to serve as Editor and Associate Editor, respectively, of the *CHP News* and *CHP Corner* this year. Under Kyle's and Harry's direction, these resources provide informative and timely articles in each area of Academy and Board operations.

Each of the committees and panels noted above relies on volunteers who are committed to the goals of the Academy. I encourage every CHP to consider their areas of expertise, their interests, and their availability, and to contact Nancy Johnson at the Secretariat's office. If you are interested and willing to be considered for nomination to an elected office of the Academy, please contact Steven King, Chair of the Nomination Committee.

As I write this message in mid-November, I realize that there are only a few weeks remaining in my term as President. The transfer of responsibilities to incoming President Ray Johnson will occur on January 27, 2013, at the HPS Midyear Meeting in Scottsdale. Ray has already selected an outstanding group of volunteers to serve on Academy committees, and 2013 should be a very good year.

With the passing of Mike Davidson and other CHPs this year, I am reminded that life is short and the time we have is truly precious. For you who have donated your time to the work of the Academy this year, I extend my heartfelt appreciation. Thank you again for allowing me to serve as President during 2012.

THE 2012 CHP SALARY SURVEY

Gary Lauten

Introduction

The 2012 Certified Health Physicist (CHP) salary survey data was collected by having CHPs submit their responses to survey questions on a web-based data entry form. The survey was also available in hardcopy form for those who preferred to fax or mail their responses.

As was done in previous years, data was collected in conjunction with a salary survey of the entire Health Physics Society (HPS). The HPS salary survey results will be reported separately in the *Health Physics Newsletter*.

Data Analysis

The salary ranges marked by CHPs on the completed survey forms were rounded to the midpoints of those ranges before statistical analyses were performed. For example, if a CHP marked the salary range \$50,000 to \$52,499, their salary was rounded to the midpoint value of \$51,250.

Responses from CHPs who were either part time or retired were not analyzed, since the data did not appear to allow meaningful comparisons to be made.

To minimize skewing the results, data from three survey respondents were excluded from the data analysis because they indicated that they earned less than \$61,250 or more than \$200,000 per year.

Of 68 respondents who reported receiving a significant (10 % or more) salary increase upon attaining ABHP certification: 28% received this increase from their current employer, 19% from a promotion with their current employer, 47% received this increase from a new employer, and 6% did not answer.

CHP salaries by region are also presented in this report.

Data Presentation

In an effort to make the results of the survey interesting and useful, CHPs were subcategorized in several ways by education, primary job responsibility, years of experience, and combinations of these subcategories.

Readers are advised that for statistical validity, results were given only if there were 10 or more CHPs within that subcategory. Data presented for one subcategory of CHPs may not be possible for another subcategory.

The subcategories in the tables may also change from year to year, depending on the number of responses received. Every effort was made to keep the subcategories consistent with previous surveys, but if there were less than 10 CHPs the results were not given.

Tables and Figures

Tables show results for full-time CHPs who received health, vacation, and retirement benefits from their primary employer unless otherwise noted.

Histograms of the data shown in “Table 1- All CHPs”, and “Table 2 - Masters Health Physics” are included as Figures 1 and 2 respectively.
